SYNERGY WORLD

## HIGH TECH II

# THE FUTURE OF THE PORTABLE RESTROOM... TODAY.

THREE YEARS OF OPERATOR-INVOLVED  
DESIGN & ENGINEERING HAS CREATED  
THE PORTABLE OF THE FUTURE, TODAY.

Until now, operators worldwide have looked far and wide for the “next best thing” in portable restroom design...look no further, the High Tech II has arrived.

The High Tech II isn't simply a new portable restroom – what it represents means far more for operators and the public alike. Synergy World has addressed the relevant needs and expectations of today's customer and anticipated the same of the future by creating a “synergy” of high-end amenities (such as the stainless steel bowl found in the Deluxe Flush model), the toughest materials available and the utmost in design and creative innovation found in any portable restroom today.

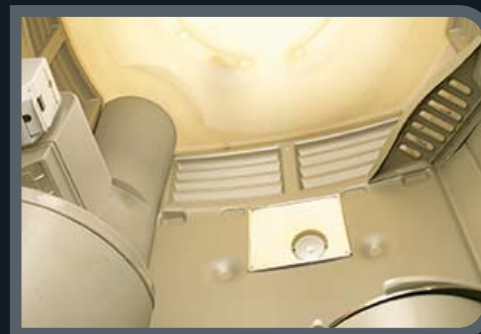

Let's look at a few of the reasons why the Synergy World High Tech II raises the bar in the sanitation industry and will set your operation apart from the competition...

# THE CLEAR ADVANTAGES

DELUXE FLUSH

- **A distinctive look** that will set your operation apart from the competition
- **Increased opportunities for greater profitability** with a higher rental value and minimized maintenance costs for upkeep
- **Greatest value and most affordable flushing unit available** when compared to a self-contained or trailer-mounted restroom
- **Durable construction substantially reduces service calls** typically associated with flushing units with little to no maintenance required
- **Enhances the overall user experience** of a portable restroom with amenities that feel “closer to home”
- **Exceeds the demands and expectations of rental operators and the public** alike with a level of quality and excellence that is unmatched in the portable sanitation industry today

*Why should you settle for anything less?*

THE FUTURE IS HERE, TODAY

# HIGH TECH II

## INNOVATION HIGHLIGHTS

### ROOF:

A unique, tinted roof design that stands out from the crowd – this U.V. resistant roof has four full handgrips on each side to ensure a firm grip when maneuvering. Double-walled and rotomolded to handle the most abusive transport conditions.

### TANK:

Synergy World research shows users prefer to be as far from waste as possible, and this 88-gallon tank does just that. Built to handle high volume usage, this unit is perfect for heavy traffic sites. Rotomolded for superior durability with deodorizer fill lines marked inside.

### BASE:

Deluxe Flush models cleverly use the rotomolded base interior as a holding tank for fresh water flushing, with an easy access fill port and flushing bowl foot pump preinstalled. *Other features include:* ten washout ports, runner grooves to prevent slipping while loading or unloading from a trailer, and greater under-unit ground clearance for pallet jack use.

### HANDWASH:

A custom fitted handwash design that blends into its surroundings, with a foot-activated pump and its own separate reservoir to keep water safe from waste.

### FLUSHING:

Nothing is worse than having to make extra service calls for a toilet in disrepair, which is why Synergy World is the first to introduce a commercial quality stainless steel flush bowl with the toughest made mounting and plumbing system to keep this flush system in operation and looking new for ages.

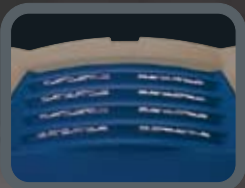

- Polished stainless steel finish keeps bowl cleaner
- Reinforced, highly durable flush mounting system with no exposed plumbing takes the punishment of high volume use
- Foot-activated pump provides a touchless experience for user
- Easy-access, fresh water fill port

# AN INSIDE LOOK

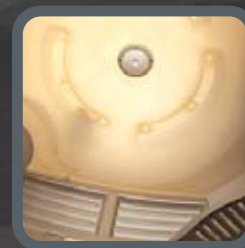

# HIGH TECH II DELUXE FLUSH

*Integral venting system and large molded-in vent slots provide greatest air flow and freshest restroom available*

*Twin-sheet thermo-formed walls make this unit the toughest around and allows for color separation from the exterior*

*Upper corner shelf allows users to safely rest personal items aside while using facilities*

*Keep paper towels and other trash out of the toilet and avoid unnecessary service calls with this custom designed waste basket – wall mounted to stay off the floor for more foot room and full access to washout ports below*

*Convenient solar powered light and 11" high quality mirror provide the upgrades today's users appreciate*

*Top to bottom handholds for easy maneuverability*

*Four-roll toilet paper dispenser fits neatly in front corner for easy access and less refilling*

*Proven rod and hinge wall assembly eliminates need for fasteners with high-pressure resistance and rigidity*

*Combination latch and hover handle made from Super Tough Dupont Nylon® aid touchless experience*

*Enclosed dual aircraft cable and spring door enclosures prevent rusting and maintain repeated opening and closing*

*Ten washout ports provide quick draining and easy cleaning*

*Upscale double-walled urinal designed to fit in the corner – an upgrade option for the non-flushing model only*

*Molded-in stake down holes help secure the unit on site*

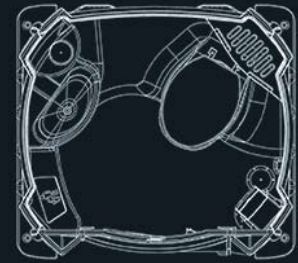

**NON-FLUSHING**  
WITH OPTIONAL URINAL

**INCLUDES:** 88-Gallon Waste Tank, 4-Roll Toilet Paper Dispenser, Upper Corner Shelf, Stainless Steel Coat Hook, Hasp, Gender Indicator, 7" Mirror  
*Optional:* Corner Design Urinal Kit

**DELUXE FLUSH**  
WITH HANDWASH

**INCLUDES:** 88-Gallon Waste Tank, Deluxe Flushing System with Stainless Steel Bowl, Foot-operated Handwash, Custom Designed Waste Basket, 4-Roll Toilet Paper Dispenser, Solar Light, Upper Corner Shelf, 11" High Quality Mirror

## IDEAL FOR...

### SPECIAL EVENTS & RECREATION

- Deluxe Flush model provides the most upscale portable restroom experience available today
- Meets and exceeds the expectations of today's guests with accommodations including a commercial quality stainless steel flushing bowl, hands-free foot-operated handwashing system, and no shortage of toilet paper with the four-roll dispenser.

**SYNERGY WORLD**

### CONSTRUCTION & MAINTENANCE

- Non-flushing model with urinal allows for even more available space and a greater range of motion for workers encumbered with tools and bulky clothing
- Upgrade to the Deluxe Flush model for full bathroom-like features for special on-site accommodations
- Ideal to have on a gender diverse work site, without a men's urinal, for a more woman friendly restroom
